

Information -> violation

The license for the text is broken, any, maybe cc-by-sa compatible, or none (cafru, afru, fru)

The author can not bear responsibility, the reader has the right not to understand correctly

The text is in development (beta test), followed by a comment of valery35 in the topic "Information is not a commodity" on the habr

Important: the reader should understand the meaning of words рушать, нарушать (violate, cut)

<http://slovardalja.net/word.php?wordid=36872>

Acknowledgments: Misha, Yura, Vadim, Vladimir Dal, Leonid Kaganov, Grigory Khoroshilov, G.A.Golitsyn, V.M.Petrov, Ali Sina (علي سينا), Julia Polezhaeva, Julia Latynina, Lyon Nadel, R. Buewell, R Feynman, P.Мопертуй, Олег Оранжевый, emdrone, vitos, Alexander Dolgin, Alexander Nikonov, Misha Verbitsky, Dima Gorchev, F.Engels, Grigory Skovoroda, Nikolay Kuzansky, Hermann Hesse, Valery Gagin, Yakov Yasman, valery35, ilya42, habr, google, osm, wikimapia.org, Google Translate, IPv4 ...)

On July 27, 10, between the habr and wikimapia, it suddenly occurred to me that ... information is any violation, a violation in general

That is, all information and information in general. Any (discretization), and in general (analog). Fake or not fake, verbiage or not verbiage? Anyway hypothesis

What can or should be understood with the word "information" ... is unclear, because everywhere there is a metaphor (filling out an saying, a cloud in pants) or an abstraction. I'm helped ...with mouse (нарушка, did not find норушка in Dal's dictionary, нарушка is diminutive of нарушение (violation)): if you close it in the corridor, put food on:

cheese

<____) ---

(Let it get used to)

Then open the passage in the wall, distracting her on the way to the cheese:

-----? !

^ ____)

cheese

(.txt Not .pdf is destroyed :-(

... then how will it behave? As if probably forgetting about eating, gently stick his nose out in the open, sniff the air, as if it is looking for something in the new situation? What is it looking for, what does it

need? Information. This is not my experiment, but I believe it and saw how information is needed, for example, to cats

Information (μωρφή ?, εἶδος - ὕμν ... 〇⊕⊖?) (Eg) 〇⊕⊖- knowledge (he) ὕμν (pre-knowledge): "ὕμν is the provision of knowledge," knowledge = memory (hand + door-movement) + The eye? 〇- D - Door-Movement, meida - Water "Yes", Positive Flow "Know" (cn) 映-formation? (映 - reflect, flickering, "shine with reflected light", "throw a reflection", "reflect", 〇- formation (no-formation) and 〇- formation (eye, source),

ἔκπληξις, ὁ (λ) ὁ-κ-ῖ, ἁ-κ-ῖ ... ὁ-ῖ-ῖ-ῖ, ἁ-ῖ-ῖ, ὁ-ῖ-ῖ ...

Πληροφορίες ... معلومات ... তথ্য ... 資訊 ... tiedot ... ചിട്ടി ... जानकारी ... upplýsingar ... Eolas ... 情報 ...

ಮಾಹಿತಿ ... 정보 ... اطلاعات ... habari ... தகவல் ... సమాచారం ... ജ്ഞാന ... bilgi ... gwybodaeth ...

Another formation, an in-idea-violation, In (易) is a change, (easily) a violation is an in-particle, a hypothetical chemical element of information, entropy informium. Free or almost free fuel :-)

De-formation, destruction related to the information-violation. The unity of creation and destruction is in violation. If this text is not in .pdf, then Greek, Egyptian or Chinese or other characters are destroyed in or 〇 and are set by installing the appropriate fonts, on utf8 gnu / linux it is done more beautifully Na-rushenie (English breaking, break, difference, changeableness, variability), ruh, Ruach, spirit, Nefesh, θεός, dhjana, dheu (blow) ... IMHO this is movement, any change, somehow related to spirit, measured in all broken, undisturbed units (bits - broken, every or not every unit, unit of violation, violate and breathe - the words of one root?) Energy, field, flow, data, thought, image, part-selection-fragment-aspect "A piece that brain "breathes", eats and emits, "such as thoughts, consciousness." "The person is the cause of the violation"

We say Infringement, we mean Information, and vice versa, what we call information is Violation, the mouse would know! For any (only whether conscious) system

there is any violation, which we call information. Or shorter: on any system there is any violation :-)

And any system is a Breach, Mobility. The world of systems provides Breach. Violation is a conscious (bypassed or not) movement. For us, information, i.e. violation of something in the experiment is also mouse itself, which is disturbed by reflexes, a violation, for example of cat, and cheese is a violation of satiety-hunger, meat-sausage and vegetable, fruits, holes, or phonetics-graphics-semantics of six letters ... walls of corridor - violation of the freedom of movement with the floor) and, most of all - the door in the wall - the violation of the closed system, the opening. P.S. Free Mouse happens only in the mousetrap escaping

Information is not demagoguery, but means of communication, applicability, necessity, usefulness, utility, functionality, (quantitative) measure of fitability (success), equivalent to entropy, violation of entropy (both are opposite violations, with different signs) ... not only or not just a "data stream"

Everything is violated. Violation is a spiritual food.

Violation is dialectical, recursive, anything (varied). Violation is also in the sense of creation, composition (production, art (visual, musical, theater, industrial, military ...)). Violation is also dispensation. Hebrew Pur (fate, lot). Disruption of your current thought. Every consciousness is a violation. Every thought is new, not the same. Violation of crows (crows can distinguish people, control their movement, even in cars, no, Yura, this is not παράνοια (paranoia), usually crows do not need it, but if necessary - control). Violation is also in the sense of Contrast. Oscillations. Curvature.

Adaptations. Violation also in the sense of proportions, fragmentation, the Golden and all Sections, Fractal, in any primitive and non-primitive sense! A mouse-narushka in the sense of grain> a croup-rush gnawer. Violation - Hack of the Unexplored, The Dao Way,

Entelechy (ἐντελέχεια). Non-violation - prohibition, constant, adequacy, fitness, conformism, monotony, addiction, preservation, repetition, law, norm, non-conversion of the mouse into a lion ... - the same

violation and its particular case as rest is a particular case of motion. Quantity-quality violations, violation of quantity-quality, cross-transit, multipolarization, known-uncharted; The known is the "decrease" (violation) of the Unexplored. 4 stars of Orion - trapezium - violation of any-corners, 3 stars of Orion's belt, or pyramids in Giza - violation of straightness-orientation - location, Odd or Even; Diversity, the state of matter in Nature, the Cosmos, the Universe, the "conservation" of the energy of the Sun, of the stars. Man is a violation of nature, and not Nature, a multi-violation among monkeys, crocodiles, trees, bottles, cork, glasses, he is multiviolated ("formed") on male and female, adults, children, etc., Biographies, diseases ... Upgrade of Monkey and Downgrade of Man - the processes of mutual violation. Everything that is created by man (languages, economy, architecture, art, the state) is in every way broken and violated. Time is a violation (spirit) of Space. Space is the "preservation" (flesh) of time. Co-knowledge, Spirit is a disturbed Matter in incorporeal signs, symbols, images. The violation has no boundaries, and no violator has perfection (Ptahhotep :). "Best" Disorders: truth, conscience, intellect, creation, true creativity, love, beauty, spirituality ... what is left of it. The "worst" violations are the destruction of the "best": lies and demagoguery, lack of conscience, cunning-stupidity, "intentional blackmail and sabotage of functionality in order to deflate profits - control over customers," etc., unfortunately, to infinity. Being and non-being break each other (Dao De Ching). Then 0, then 1.

What will be the violation serve, harmony or chaos? How is it, absolutely paradoxical,
 $e^{i\pi} + 1 = 0$?

The reasoning of the Theory-Practice of the Violation is the theory-practice of freedom for people, but not "peoples" rams. IT - Technology of violations (or call it HT - broken technology, or Hack Technology). Era of Violation, HEra (Hack-era)

Let me be protected, saved from: insolent lies, dogmas, religion-substitution -of-conscience-measure-faith. Ali Sina hacked so-called Islam in 2002 <http://alisina.org/> There is no Islam after Ali Sin. لا إسلام بعد علي سينا

Solaristics does not dwindle, Tarkovsky "Solaris" is fantastically truthful
 Let there be in me the non-participation and collapse of totalitarianism, political correctness, intolerance to someone else's incomprehensible, "friendly" and all fascism (the monopoly of readiness to destroy) and neo-feudalism (slaves and fences for them development), copyrusting, all vandalism, zombie manipulation, Ignorance (bliss), the commercialization (functions) of the brain, intellectual, professional parasitism-terrorism, etc., mental "intellectual" masturbation (opposite to spiritual fecundation)!

Shame and disgrace (lat. - porno?) to garbaged "information" - everything in me that is not in its place, not in its quantity, not in its time - uselessness, imposition, violence, spam ...

I would go to hackers, who will teach me, hackers - the mind, honor and conscience of our time. Creative Commons, GNU / Linux (GNU is bhregged Unix), Open Source rulling. If the intellect is appropriated, given out for property or closed by gags, fools, provocateurs, rogue parasites, mediators, it may already be a crime. Time to break? Yes, why not, if where, what and when is needed - money-debt-economy (but how), "state" - "power" - "corruption," some relations of people. Time to throw out (friendly fascist) TV, narcotics tele virus-99%, destroying the brain. Maybe the hour or the bit of Free Labor, Time for the Free Man, is finally has come. The difficulty becomes unnecessary, the need will not be difficult, mvs = min. Is it already the decline of neo-feudalism? Politicians. One-bitocracy. To everyone, including intellectual, defective and fictitious work - comes to replace the intellectual, not a false equivalent of value, (club?) money. Liquid (blood, saliva ...) Gaseous (inhaled-exhaled), plasma ... Sign Capital? If it does not get worse, then let it be long live. Intellectual Value of someone or something is how people respecting intelligence of someone or something. Fools, provocateurs are not obliged to move Progress to their side or claim a monopoly and they can now be neutralized, banned (okay, if I'm one of them, then maybe not 100%).

O, world of violations, are not you unlimited! When it seems that the world of violations is visible to the edge, this is a violation. light and shade, continents and oceans, circles and squares, infinity and

beginninglessness (ἀναρχωσις) - are interrupted ... World of Information is a unite world of monotony disturbance. Disgrace happens from non-violation, monotony. How I dare to ignore it, do not understand, be afraid and hate the word "otherwise"? Fences - the collapse of freedom. It's nice to break boundaries - it's cool, even steeper - to destroy them, and there is no freedom or rights to be a moron, a vandal or to create lawlessness, hell with liberal fundamentalism, a measure (violation of violations) will order any mess, corruption, disharmony

Political economy violations - newoverunderreproduction, copy paste technologies, sophisticated inventions-innovations, cuts, kickbacks, consumer forces and consumer relations ... Production methods are broken up by methods of destruction - flows of money, corruption, all metha information. Production (why?) of also absurd, superfluous, unnecessary, garbage. Friendly fascism - is it capitalism or socialism? Streams of misinformation and misconceptions are broken by enlightenment, sobering. The states will wither with all parasites and intermediaries, like dew in the sun, no need to raise blackmail and sabotage, to plant people-suckers. 6%: 19%: 75% -proportion - Shameful section (creation, non-parasitism and parasitism). IP (so-called "information property") - an oxymoron (Greek "smart stupidity"), 75% demagoguery. The Third Temple is Broken. New, old, every god is information = violation. The unit of God is a bit. God is and there is no God; sometimes He is, sometimes he is not; When he is, he is no more, and so on. Knowledge is faith. I corrupt the information - if I ignore it (smartly-stupid), privatize (chauvinism), sell (insolence), spoil, destroy (vandalism), distort (lie), litter (pig), impose (violence, terrorism) - IMHO it's a sin, a crime .

The concept of spiritual fecundation against the concept of mental, info, "intellectual" masturbation. When a person does not have the ability to fertilize, he will knowingly or unconsciously ...

Correct me, break, continue! Write your Concept of Information, it will turn out completely different.

P.S. The shepherd was talking to a flock of sheep near the village of Dakhi: "Shahabi, Shuis" - the sheep stood and ate. "Rrrrr, schA" - followed him. (cybernetics:). We humans are violation of sheeps ... I did not say "PPrrrr, schA," if that
I hide the important information in the past that needs to be discovered.

Information - every (good, positive) violation, every break, every infringement, every deviation ... Every "Narushenie" in Russian (root "Rush" - spirit-mind, "change" :), Exactly and inaccurately: information is a narushenie (violation). The word "rushit'" also had the meaning of "cut", "slice", "render", "move - give motion"

Rahaf, P. and R. Ferrer

Without demagoguery, what is it information? For this research is done (drawings above): Put a mouse into a closed place until it gets used to the situation

Let it eats, till will get used to the food. Then on the way to the dining area, you open an opening in the wall. How does a mouse behave? He takes a nose out of the doorway, smells of air. Looking for something. What is it looking for, what does it need? We say - information

γινωσκῶν ἡ ἀλήθεια ἵνα γινώσκῃς τὸν Θεόν?

Floridi: The word "information" is commonly used so metaphorically or so abstractly that the meaning is unclear, imho it is not just «data flow»

Gregory Bateson: A difference that makes a difference

Bhreging diversity Just for FR (bhreg)!
